Conservation Commitment

PT. Bio Inti Agrindo is committed to preserving conservation areas within its operational footprint. This commitment is part of our ongoing adherence to the NDPE (No Deforestation, No Peat, No Exploitation) policy, which also extends to our supply chain.

Our commitments include:

1. **Sustainable Biodiversity Management:** We are dedicated to maintaining, preserving, and enhancing biodiversity and its components sustainably within our operational areas.
2. **Ecosystem Protection:** We will not undertake business development activities in natural ecosystems and will only utilize land designated for palm oil development by the government.
3. **High Conservation Value Assessments:** Land development will only proceed after conducting a High Conservation Value (HCV) assessment.
4. **Integrated HCV Area Management:** We will maintain areas designated as HCV in an integrated manner.
5. **Watershed Protection:** We commit to protecting watershed areas.

Our strategies to achieve these commitments include:

1. **HCV Area Protection:** We will refrain from activities that could harm HCV areas, conducting scheduled patrols with teams and local communities.
2. **Informational Signage:** We will install information boards in HCV areas and conduct regular monitoring.
3. **Continuous Training and Outreach:** We will provide ongoing training and awareness programs for employees, contractors, local communities, and relevant stakeholders.
4. **Strict Enforcement:** We will take decisive action against incidents of poaching and harm to endangered species.
5. **Stakeholder Collaboration:** We will collaborate with other stakeholders on initiatives aimed at conserving biodiversity and ecosystems.
6. **Evaluation and Reporting:** We will evaluate and report our activities to the government, ensuring that information is publicly accessible on a regular basis.
7. **Chemical Application Restrictions:** No chemical applications will be permitted along riverbanks
